

SOLUTION BRIEF: SONICWALL NSv PROMO

Protect your multi-cloud and make the transition easier and safer

Abstract

The SonicWall NSv promo enables organizations to extend the next-gen security of their private data center to the public cloud and ensure end-to-end security of their multi-cloud environment. Organizations can then test drive SonicWall virtual firewalls at no additional cost or commitment to see if it fits their needs and requirements.

Security Challenge

When migrating to the cloud, IT must make challenging decisions regarding budget and security. Common pain points include:

- Keeping pace with changing technology
- Budget constraints
- Securing hybrid cloud infrastructure

- Single-pane-of-glass management across physical and virtual environments
- Maintaining consistent security policies throughout
- Stopping advanced malware
- Business impact, if there is a damage caused by advanced threats
- End-to-end visibility and control of traffic

SonicWall Solution

The SonicWall NSv promo enables organizations to deploy and test a virtual copy of their SonicWall hardware firewall. This can extend the security of the datacenter to private/public cloud environments, ensuring end-to-end protection of the hybrid cloud. Essentially, this enables organizations to try a SonicWall virtual firewall, and see if it is the right fit for their needs without any commitment.

The following products are available as part of the SonicWall NSv promo:

- NSa 5650 + NSv 200
- NSa 6650 + NSv 200
- NSa 9250 + NSv 400
- NSa 9450 + NSv 400
- NSa 9650 + NSv 400
- NSsp 12400 + NSv 800
- NSsp 12800 + NSv 800

The SonicWall Network Security virtual (NSv) series is our next-generation virtual firewalls, which brings industry leading NGFW capabilities such as application intelligence and control, real-time monitoring, IPS, TLS/SSL decryption and inspection, advanced threat protection, VPN and network segmentation capabilities to protect the virtual environment. NSv supports all security and networking features similar to SonicWall next-gen hardware firewall appliances including our patented Reassembly-Free Deep Packet Inspection (RFDPI™) technology and award-winning Capture ATP sandbox with patent-pending Real-Time Deep Memory Inspection (RTDMI®) for advanced threat protection.

Those who plan to purchase, or have already purchased, the eligible NSa/NSsp products (see sidebar table), are able to try NSv products at no additional cost. Upon registration in MySonicWall, the NSv key is sent to the registered email. The promo includes TotalSecure Subscription, which combines the firewall services with SonicWall Comprehensive Gateway Security Suite (CGSS), Capture Security Center (CSC) and 24x7 support for one year. After this period, there is an option to renew it. Additionally, the Advanced Gateway Security Suite (AGSS) can be purchased separately a-la-carte and layered on top of their existing security solution.

Key benefits of the SonicWall NSv promo includes:

- Next-Gen security for private and public cloud infrastructure and resources
- Gain complete visibility into physical and virtual environment for threat prevention
- Implement proper security zoning and ensure appropriate placement of policies
- Defend against zero-day vulnerabilities with SonicWall Capture ATP
- Prevent any service disruption in the virtual ecosystem
- Centralized control and visibility with single-pane-of-glass management via SonicWall CSC
- Agility and scalability without performance impact
- Security governance, compliance and risk management

Conclusion

The SonicWall NSv promo provides next-gen security solutions to protect against advanced threats across data centers and cloud infrastructure, making cloud transformation easier and safer.
